

## Controlled Release Fertilizer

A **smarter** source of nitrogen  
A **smarter** way to grow

# Facts From the Field

## Spring Nitrogen Application Delays Due to Weather?

When spring weather delays your fertilizer application and planting, let ESN help. ESN's patented polymer coating is designed to prevent nitrogen loss from all three primary loss mechanisms, including leaching, making ESN an excellent choice to protect your nitrogen investment during wet spring conditions.

**Before** you apply your N fertilizer this spring, think about the following ways in which **ESN Smart Nitrogen** can help your operation:

- ESN's patented coating **protects your N** from leaching and other loss mechanisms, allowing you to get better yields.
- ESN provides a **wider application window** in the spring, letting you to apply fertilizer on your schedule.
- ESN can be **quickly and safely applied** when conditions are not suitable for anhydrous ammonia application.
- ESN can be blended with other dry fertilizers, making it **convenient to use and easy to apply**.

So when conditions are right this spring start planting and rely on ESN as a post-plant top-dress to supply your nitrogen needs. Not only will you free up time to plant but you will also be sure to get the most out of your nitrogen investment.

**Call your ESN representative today to find out how ESN can maximize your profits and reduce the potential for inadequate nitrogen this growing season.**

ESN is the only controlled release nitrogen source widely available in agriculture, providing growers with a return on investment through increased nitrogen efficiency.

### How can we help?

To make ESN a part of your nitrogen program, contact an authorized retailer or Agrium Advanced Technologies representative.

### Agrium Advanced Technologies

2915 Rocky Mountain Avenue  
Suite 400  
Loveland, CO 80538
